#### *The Mandela Effect (False Memory):*

A false memory is a psychological phenomenon where a person recalls something that did not happen. There is a growing body of evidence that false memories are created whenever memories are recalled

*See, I thought Nelson Mandela died in prison,*

*I thought I remembered it clearly, complete with news clips of his funeral, the mourning in South Africa, some rioting in cities, and the heartfelt speech by his widow.”*

*-Fiona Broome (Coined the term Mandela Effect)*
